

## Metabolic Screening Procedure Codes

Email from Tom Rehak January 7, 2011

This is to let you know that we have approved billing the Metabolic Screening procedure codes for clients not enrolled in the Community Psychiatric Rehabilitation (CPR) program.

Previously these codes were only approved and set up to bill for clients enrolled in Adult or Youth CPR. Several providers asked for permission to do the screenings also on DMH clients not enrolled in CPR. Please note that while it is a requirement that CPR enrolled clients on antipsychotic medications receive the metabolic screening service annually, it is not required for non-CPR clients. If an agency chooses to do so voluntarily, and has general revenue funds available, you may now provide and be reimbursed for the screening to non-CPR clients.

The procedure codes to bill to CIMOR are the same as the MHD codes:

- H2010TE – Metabolic Screening (LPN) \$35.38 per screening
- H2010TD - Metabolic Screening (RN) \$35.38 per screening

For non-CPR clients, when you do the screening, you may bill it in CIMOR under the following service categories:

- CPS Adult Community Services (old POS fund code Z9)
- CPS Youth Community Services (old POS fund code ZT)
- CPS Adult Medication Services (old POS fund code WM)
- CPS Youth Medication Services (old POS fund code WM)

Your contracts have been amended to reflect the metabolic screening codes for these additional service categories in CIMOR.
